Incledon is committed to providing service integrity and sustainable, quality products to the infrastructure, agricultural and industrial markets.

Incledon is furthermore committed to providing products that meet or exceed local and international standards, in quality, reliability and performance.
Route to Market

Imported Brands

Wholesale
- Plumbing Merchants
- Engineering Merchants
- Irrigation Merchants
- Agricultural Co-Op
- Tool Merchants
- Civil Merchants

Industrial and Commercial
- Steel Fabricators
- Fire Protection Installers
- Air Conditioning Installers
- Petrol-Chemical
- Mines
- OEM
- Process Plants
- Mechanical Engineering Installers
- Pump Installers
- Irrigation Installers

Local Brands

Infrastructure
- Civil Contractors
- Building Contractors
- Municipalities
- Government

Export Wholesalers
- Botswana
- Namibia
- Mozambique
- Lesotho

Quality Fluid Conveyance Products
Incledon supplies products utilised in the conveyance of water, gases and liquids. Incledon has the largest consolidated quality product offering in its industry and is well positioned to take advantage of the infrastructure and industrial development spending programmes.

Today, Incledon stocks over 15 000 preferred quality fluid conveyance products and provides a wide range of approved and highly recognised brands of pipes, fittings, valves, flanges, pipe working tools and threading machines, HDPE compression fittings, pumps, electrofusion fittings, windmills, sprinkler systems, water meters, residential, commercial and golf irrigation systems, plumbing pipes and fittings and related products used in the industrial engineering, mining, municipal, civil, plumbing merchant and irrigation markets.

Product Offering

Fittings and Flanges

Product details

Fittings and Flanges are supplied in various ranges in order to connect and redirect relevant pipe work material.

An extensive range of high quality fittings and flanges are distributed by Incledon to the various fluid conveyance markets. Every precaution has been taken to ensure that products are certified and supplied in accordance with the relevant quality standard. Each Fitting and Flange range distributed by Incledon is backed by the quality and service commitment of Incledon.

Pipe Couplings

Product details

Each Pipe Coupling range distributed by Incledon is backed by the quality and service commitment of Incledon. Every precaution has been taken to ensure that products are certified and supplied in accordance with the relevant quality standard. The extensive ranges of pipe couplings ensure any pipe material can be coupled with ease.

The extensive ranges of Pipe Couplings as listed below, ensures that any pipe material can be coupled with confidence:

- Kiamflex
- Mech Junior
- Mech Grooved
- Cascade Repair
- Klambon
- HIC Short Collar
Pipes

Product details

Incedon currently carries an extensive range of pipe materials (Steel, PVC and HDPE) servicing the various conveyance markets. Every step has been taken to ensure that products are certified and supplied in accordance with the relevant quality standard.

Each Pipe range is backed by the quality and service commitment provided by Incledon.
Valves

Product details

Valves are devices that regulate, direct or control the flow of fluids (gases, liquids, fluidized solids, or slurries) by opening, closing, or partially obstructing various passageways.

Incledon carries an extensive range of valves that service the various fluid conveyance industries in South Africa. Every precaution is taken to ensure that products sourced are certified and supplied in accordance with the relevant quality standard. Each valve range distributed by Incledon is backed by the quality and service commitment of Incledon.
Pumps and Irrigation

Product details

Pumps move fluids or sometimes slurries by mechanical action. Pumps can be classified into three major groups according to the method they use to move the fluid: direct lift, displacement and gravity pumps.

Irrigation methods control, at regular intervals, the amount of water that is supplied to plants. It is used to assist in the growing of agricultural crops, maintenance of landscapes, and revegetation of disturbed soils in dry areas and during periods of inadequate rainfall.

The Pumps and Irrigation ranges of products supplied by Incledon, services various applications including but not limited to: domestic and light commercial pressure systems, dewatering pumps for ponds, pools and sumps, irrigation system pumps for the use of Commercial Irrigation, Agricultural, Residential Irrigation, Sports Fields and Golf Course Irrigation.
Pipe Working Tools

Product details

Pipe Working Tools are often considered as accessories for pipe work or pipe installations and is made up of a number of different tools such as wrenches, hack saws, pipe threaders and vises etc.

World renowned RIDGID tools go to work every day in industrial plants, on construction sites and in countless other harsh environments. These tools operate in the extremes of heat and cold, withstand dirt and mud, and perform reliably day in and day out. RIDGID is known to be the industry-leading tool manufacturer that allows professionals like you to complete jobs more quickly and reliably.

Incledon is proudly associated with the RIDGID Tool Company and carries an extensive range of RIDGID Pipe working tools that is supplied to the various fluid conveyance industries that we service.
